

Suhyun CHOI

chltnus234@snu.ac.kr

010-9767-7845

EDUCATION

- **Seoul National University** (2022-2027.02, expected)
Biosystem engineering, Collge of Agriculture and Life Sciences
GPA: 3.46/4.3
- **Seoul National University** (2022-2027.02, expected)
System Semiconductor Engineering for AI, Interdisciplinary Major

Internship

- **Lab of Artificial intelligence and Big data for Agriculture (SNU LABA)**
Undergraduate Researcher 2025.09-2026.06

PROJECTS

- **Plant Leaf Disease Feature Disentanglement (Representation Learning)**
- **LLM Memory**

SKILLS

- **Programming**
Python, Java, C++ (Currently studying)
- **Languages**
Korean, English

Extracurricular Activity

- **Vice President of the Department Student Council** 2023.08–2024.08
- **Peer Mentor in SNU** 2025.09–2025.12
Lecture: Applied Electrical and Electronic Engineering with Laboratory
- **Peer Mentor in SNU** 2023.03 – 2023.07
Lecture: Physics

EXPERIENCE

- **Exchange Student** 2025.03–2025.09 (6 months)
RWTH Aachen University in Germany, majored in electrical engineering

- **Robotics Club of My Major Department**

2023.07-2024.08

Participated in the following projects:

- 1) Small-Scale Smart Farm System Design : Designed an AI-based irrigation system using Raspberry Pi to optimize growth conditions for selected crops. Implemented an automated watering system using temperature, humidity, and soil sensors for real-time environmental control.
- 2) Autonomous Navigation Control for TurtleBot-Based Orchard Harvesting Robot : Developed autonomous navigation algorithms in a Linux environment for TurtleBot to navigate complex curved orchard paths while avoiding obstacles. Contributed to fruit detection and counting functions using camera and LiDAR sensors with a YOLO-based object detection model.

Global Certifications

- Toeic Speaking Test Score: 140
- Toefl IBT Score: 82 (Best Score)

Relevant Coursework

- Fundamentals of Computer Science
- Introduction to Computer Programming
- Fundamentals of Data Structures
- Computer Programming
- Fundamentals of Machine Learning
- Fundamentals of Deep Learning
- Introduction to Embedded Systems (in Germany)
